

SANKESH LAL

Data Scientist | Python | Machine Learning | NLP | Scikit-learn | Streamlit | Open to Opportunities

+92-308-3484370 • sankesh.lal12@gmail.com • LinkedIn • GitHub • Portfolio • Kaggle

Professional Summary

- Data Scientist with hands on experience in **Python**, **Machine Learning**, and **NLP**. Built end-to-end projects including mental health score prediction, spam detection, sentiment analysis, and laptop price prediction systems. Skilled in **Pandas**, **Scikit-learn**, **Streamlit**, and data visualization. Experienced in building and deploying ML applications with good performance.

Experience

Machine Learning Intern

Feb 2026 - Mar 2026

Arch Technologies

- Developed an NLP-based Email/SMS Spam Detection system to identify and filter unwanted messages, achieving **87% accuracy** and **82% precision** using Multinomial Naive Bayes.
- Compared 5 ML models and evaluated performance using key classification metrics.
- Deployed a real-time spam classification web app with Streamlit Cloud.
[Demo](#) [GitHub](#)
- Designed and trained a Handwritten Digit Recognition model on the MNIST dataset for automated digit classification, achieving **92% accuracy** with confusion matrix evaluation. [GitHub](#)

Projects

MENTAL HEALTH SCORE PREDICTION

July 2026

- Created a machine learning model that predicts a student's mental health score based on daily habits like screen time, sleep, study hours, and stress level, using Python and Scikit-learn.
- Trained and compared multiple regression models, with the Random Forest model achieving the highest prediction **accuracy 90%**.
- Deployed the project as a live web application using FastAPI on Vercel, allowing users to get real-time predictions through a simple form.
[Demo](#) [GitHub](#)

LAPTOP PRICE PREDICTOR

Mar 2026

- Built a laptop price prediction pipeline to estimate market prices based on key hardware features, comparing multiple regression models where **XGBoost** achieved the best performance with an **R² score of 0.87**.
- Applied feature engineering and EDA using Pandas, NumPy, Matplotlib, and Seaborn.
[Demo](#) [GitHub](#)

MOVIE REVIEW SENTIMENT ANALYSIS

Jan 2026

- Predicted positive and negative sentiment from customer reviews and feedback using TF-IDF vectorization on 50,000 IMDb reviews.
- Logistic Regression achieved **88% test accuracy**, outperforming other models through evaluation using accuracy and confusion matrix metrics.
- Deployed an interactive Streamlit app for real-time sentiment prediction.
[Demo](#) [GitHub](#)

Education

Shah Abdul Latif University

Khairpur, Pakistan

Bachelors of Computer Science

Jan 2020 - Dec 2023

Technical Skills

- **Programming:** Python
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK, Streamlit
- **Tools:** Jupyter Notebook, Google Colab, VS Code, Git & GitHub and Streamlit Cloud
- **Concepts:** Machine Learning, NLP, Text Preprocessing, TF-IDF, Feature Engineering, EDA.
