

SANKESH LAL

Data Scientist | ML & NLP | Python · Scikit-learn · Streamlit | Real-World AI Solutions

+92-308-3484370 • sankesh.lal12@gmail.com • LinkedIn • GitHub

Professional Summary

- Data Science enthusiast with strong skills in **Python** and **Machine Learning**. Experienced in building real-world projects including prediction systems and NLP-based applications. Skilled in data analysis, visualization and model building using tools like **Pandas**, **Scikit-learn** and **Streamlit**. Focused on solving problems with data and continuously learning advanced AI technologies.

Experience

Machine Learning Intern

Feb 2026 - Mar 2026

Arch Technologies

- Built an Email/SMS Spam Detection system using NLP pipeline (tokenization, stopwords removal, stemming, TF-IDF vectorization) Multinomial Naive Bayes achieved **97% accuracy and 94% precision** on a 5,574-message dataset, outperforming SVM and Logistic Regression baselines.
- Trained, evaluated, and compared 5 classifiers (Naive Bayes, Logistic Regression, SVM, Random Forest, XGBoost) with performance tracked via accuracy, precision and confusion matrix.
- Deployed a real-time Streamlit web application for spam classification, accessible via Streamlit Cloud.
- Designed and trained a Handwritten Digit Recognition model on the MNIST dataset, achieved **92% accuracy** using classification algorithms evaluated with confusion matrix analysis.

Projects

LAPTOP PRICE PREDICTOR

Mar 2026

- Built a regression pipeline to predict laptop prices from 8 features (brand, RAM, CPU, GPU, storage, screen size, OS) compared Linear Regression, Random Forest, Gradient Boosting, and XGBoost.
 - XGBoost achieved best performance with **R² score of 0.87**, applied feature engineering and EDA using Pandas, NumPy, Matplotlib, and Seaborn.
- [Project Link](#)

EMAIL/SMS SPAM CLASSIFICATION

Feb 2026

- Classified messages as Spam or Not Spam using NLP preprocessing (tokenization, stopwords removal, stemming) and TF-IDF vectorization on a 5,574-message dataset.
 - Multinomial Naive Bayes achieved **97% accuracy and 94% precision**, outperforming Random Forest and XGBoost baselines.
 - Deployed real-time inference web app on Streamlit Cloud.
- [Project Link](#)

MOVIE REVIEW SENTIMENT ANALYSIS

Jan 2026

- Predicted positive/negative sentiment on 50,000 IMDb reviews using TF-IDF vectorization with Logistic Regression, Naive Bayes, SVM, and Random Forest.
 - Logistic Regression achieved **88% test accuracy**, evaluated all models using accuracy score and confusion matrix.
 - Deployed interactive Streamlit app with real-time sentiment prediction.
- [Project Link](#)

Education

Shah Abdul Latif University

Bachelors of Computer Science

Khairpur, Pakistan

Jan 2020 - Dec 2023

Technical Skills

- **Programming:** Python
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, NLTK, Streamlit
- **Tools:** Jupyter Notebook, Google Colab, VS Code, Git & GitHub and Streamlit Cloud
- **Concepts:** Machine Learning, NLP, Text Preprocessing, TF-IDF, Feature Engineering, EDA.
